Chef Master

Chef Master is a PC application that helps people deal with every-day cooking challenges. This application is more than just a mere recipe database. Its intelligence lies in that it can anticipate recipes liked by its user(s) and that it can display recipes that may be cooked right away without having to worry about ingredient availability.

Furthermore, Chef Master gets smarter every day by synchronizing its database with other Chef Master users meaning that its recipe database is constantly expanding. With its powerful conversion system, users may cook recipes from anywhere in the world. Lastly, Chef Master does not require an active Internet connection.
