

# CAD Preview - Company License

**3D/CAD Preview** is a professional tool used for viewing CAD models with excellent speed and quality. It boasts a very user-friendly interface for beginners and in the same time provides full range of tools for navigation and analyzing the 3D object. **3D/CAD Preview** allows you viewing 3D object quickly but without launching a huge modeling system, such as AutoDesk Inventor, Pro/E, UGNX etc.,.

## Supported file format:

- IGES File (\*.iges;\*.igs)
- STEP File (\*.step;\*.stp)
- STL File (\*.stl)
- OBJ File (\*.obj)
- AutoCAD DWG/DXF File (\*.dwg;\*.dxf)

## Features:

- Four preview modes: Wireframe, Shaded, Rendered, Hide lines
- Full screen Anti-aliasing
- Hardware acceleration
- Dynamic zooming from toolbox or with mouse
- Dynamic rotation by toolbox or with pressing and hold middle mouse button
- 2D view in all 4 sides of 3D object
- Support AutoCAD DWG/DXF file

## Why do you need a 3D Previewer?

When you open 3D object, you need speed and good interface to view every detail in that 3D object. 3D/CAD Preview provides all these features. With ability to add shade-skin, you can see every part how should/will look like in real. Rotating the object allowing you to see every detail in every side of the 3D object. With wireframe and rotating in the same time you can see all elements that created 3D object as one whole.
