EATree MT5 (3 licenses)

EATree MT5

EATree MT5 is the first drag and drop expert advisor builder for MetaTrader 5. Although MetaTrader 5's powerful trading language MQL5 is very complex, EATree for MetaTrader 5 makes it so easy to create expert advisors and forex signals in few minutes. You simply connect trading blocks or boxes together to create a layout or a tree of boxes. EATree has a visual color system to guide you through this process. EATree then converts this visual representation of forex trading strategies to a ready to use MetaTrader 5 expert advisor or forex signal. You do not need any programming or even knowledge of the MQL5 trading language during this process.

We are very confident to state that EATree MT5 is the first and most powerful MetaTrader 5 expert advisor builder on the planet.

Why EATree

Ease of use
Easy to use and understand drag and drop graphical user interface. You simply connect trading blocks or boxes together to create a layout or a tree of boxes. EATree has a visual color system to guide you through this process.

No Programming
You do not need to have any programming background or even knowledge of the MQL trading language to use EATree. EATree converts the visual representation of forex trading strategies that you create in EATree to a ready to use MetaTrader expert advisor or forex signal.

Power
Access to powerful trading tools such as money management, trading controls, trailing stops, time zones, hedging, martingale, news, and much more.

MQL Learning
If you have some programming background, you can quickly learn MQL trading languages. Every time you create a new box and connect it, you can instantly view the MetaTrader expert advisor code and learn from analyzing code changes.

Privacy
Privacy of your trading secrets. No need to share your ideas with anybody. You can create your MetaTrader expert advisors or forex signals privately.

Development Speed
You decrease expert advisor or forex signal development time to minutes instead of days or months. You can create a library of layouts or trees of boxes while you are working to reduce development time drastically.

Complex EAs
You can develop complex MQL expert advisors and forex signals with multiple currencies and multiple timeframes.

Efficiency

You can reuse code by saving and loading layouts or trees of boxes. You can create a database of layouts or trees of boxes while you are working, this will speed up your next project development time.

Error Free

You create correct MetaTrader expert advisors and forex signals code every time, assuming that you follow software installation and update instructions.

You can get all of this for free!
