

IvyBackup Standard Edition

IvyBackup is a light-weight, efficient and user friendly smart backup tool for Windows. It helps you create and schedule your backups in the shortest time possible.

IvyBackup simplifies your backup process because it features a unique level of backup customization and an accommodating user interface. All this allows you to create and automate simple or complex backup tasks with ease.

IvyBackup creates full and smart backups (differential and incremental). It performs backup tests and can run completely automated backups.

Built with speed and efficiency in mind, IvyBackup is incredibly fast; it is optimized for low resource consumption, it's designed not to slow you down.
