

# [muvee Reveal Encore Spring Sale!](#)

Create videos that move. Choose your own music, or select from the licensed music we have hand-picked for each Style. muvee Reveal analyzes the music and makes sure your video cuts to the beat and follows the intricate contours of the emotional index.

muvee Reveal Encore is smart enough to zoom into faces in your photos automatically. Well, if you prefer to feature something else, just drag the spotlight. You can also make the camera scan across a picture and dictate start and end points and even how much to zoom. magicSpot lets you be the Director of Photography.

Add any music, choose just the chorus, or string together 3 songs. Then blend in some audio from the video soundtrack to capture the laughter, applause, or wind.

muvee Reveal Encore supports all the popular consumer video formats, whether from Dad's 10-year-old camcorder or his latest GoPro Hero. Upload to YouTube, Facebook, Vimeo or save a copy on your iPhone or iPad, for everyone's viewing pleasure!
