

Namo WebEditor ONE - 1st year subscription (Support only MAC)

Namo WebEditor ONE Windows version features include:

- Draw instead of coding Drag-and-drop widgets to design you pages, and let the Namu WebEditor ONE take care of the coding. Save development time & cost.
- Scalable to fit screens Namu WebEditor ONE gives you the power to build responsive websites. Our intuitive UI makes creating mobile pages much easier.
- Pixel perfect canvas view No more half pixels, dirty shapes or alpha-blended messes. Namu WebEditor ONE also offers zoom, ruler and guideline tools.
- Back-end integration: Namu WebEditor ONE projects can be integrated with back-end frameworks such as AngularJS, Django, NodeJS, JSP, PHP and WordPress.
- Data binding If your website is not static web page and needs dynamic data, composition and collection widgets are available at your use.
- Code customization Namu WebEditor ONE helps you utilize any function without any limitation. You can insert custom codes to any element
- Collaboration Use Namu WebEditor ONE for team projects. For those with enterprising needs, prototype mode helps share documentation.
- Project management Keep revision history with notes for each element. Drag screens between columns and check project status at a glance.
- Document exportation Automatically export your project document to keep track of work, or share.
