- Password protection for easy administration.
- Console scanner, which simplifies the integration of the product into the production processes of any company.
- Game mode, providing optimal settings for a comfortable game.
- Russian and English interface.
- Ability to switch the appearance and language interface "on the fly."

Benefits:

Simplicity and convenience

High scanning speed

Dynamic licensing system

High level of malware detection

Antivirus solutions of NANO Security Ltd are certified by Intel, OPSWAT, 1C and officially recommended by Microsoft for use on Windows operating systems. NANO Antivirus Pro has a number of awards of testing laboratory VB100.

About dynamic licenses

A new approach, applied in NANO Antivirus Pro, allows you don't think about the number of licenses you need to protect your devices. It is enough to purchase one license and then use it to install NANO Antivirus Pro on other computers. The number of remaining days of protection is distributed equally among all your devices. If you use one activation key on additional computers, you get bonuses, in the form of additional days of protection.

The system for calculating bonuses for dynamic licenses:

Product	Bonuses on connecting an additional device*			
	2nd device	3rd device	4th device	5th device
NANO Antivirus Pro (200 days of protection)	50	—	—	—
NANO Antivirus Pro (500 days of protection)	230	50	—	—
NANO Antivirus Pro (1000 days of protection)	153	153	153	—

*Activation of each next installed copy of the program is possible if the rest of days after

distribution is not less than 90 days for each protected device.
