

ProfExam Suite (Creator + Simulator) Christmas Promo

ProfExam Creator will facilitate the job of creating tests, exams, and quizzes in any language. You can create tests not only to assess the knowledge but also to prepare to an exam (displaying the answers, hints, and training material).

ProfExam Creator supports 3 major test types: single choice, multiple choice, and filling in. The editor provides extensive formatting for both question text and answer options, hints, and training materials.
