

Task Organizer

The program would help you not lose the taste for life while remaining productive. The basic concept of the program was taken from the wheel of life, which contains the most important areas of human's activities. The program enables you to monitor your current state for each of those areas. Besides that, the program has a wonderful feature – you can set goals and monitor how they are being achieved. It allows you to make up several plans; one for the entire life, another one – for a year, a month, etc. Task Organizer does not replace other productivity and planning tools; it rather perfectly completes them.

We recommend you to use Task Organizer daily, and gradually you will make your life more balanced and harmonious.
